Waxwing *Bombycilla garrulus*

Richard Brooks has been based full-time in Norfolk since 1995 (having purchased his cottage in 1978 when he first started birding seriously - followed by a growing obsession with bird photography since the late 80's). Now that his book 'Birding on the Greek Island of Lesbos' is officially out-of-print he's considering another work involving owls - his chief avian passion! Since Barn Owls have now been resident in his purpose-built loft space since 2008 (after a patient 15 year wait) and unusually have been double brooded over the last two years he has plenty of time to study them via CCTV! He also does a lot of conservation work placing converted tea chests in suitable buildings (A-Frame boxes being necessary for outdoor use) and anyone within a twenty mile or so radius is welcome to contact him to this end.

You can see further details of what else he can offer (eg guided birding and photography from his 4x4, talks, prints and greetings cards) by visiting his website www.richard-brooks.co.uk emailing him email@richard-brooks.co.uk or a good old-fashioned phone call on **01328 878632** (mobile **07780 886600** in emergencies).

A percentage of the proceeds from this calendar goes towards the cost of monitoring and maintaining his 700 odd owl boxes and running his garden feeding station.
